THE LASER Beautique®

MODULE 3

What We Do Best

3.1. TREATMENT PORTFOLIO

Laser Hair Removal

At The Laser Beautique, we use our very own state-of-the-art BeauLase machine. A triple-wavelength laser, complete with a cooltip to ensure that we can safely and effectively treat all skin types and tones without pain or discomfort. Our laser is effective on all pigmented (black and brown) hair.

Apilus Electrolysis

We are also responsible for bringing the advanced Apilus Electrolysis machine to South Africa. The Apilus device was developed by Canadian company, Dectro, and is the first electrolysis machine to make the treatment speedy and comfortable. Unlike traditional electrolysis, which was painful, slow, and often caused scarring, the Apilus has a finer probe and faster current to ensure a comfortable treatment and no downtime. Eectrolysis is also the only FDA approved method of permanent hair removal, and is effective on all hair types and colours, including blonde, white, grey, and red.

TLB Scientific Skincare Treatments

The Laser Beautique also has our own range of skincare treatments based off of our Scientific Skincare retail brand. These include Microneedling, Bioneedling, Chemical Peels, Dermaplaning, Thermal Sculpting and more.

CooLifting

CooLifting is an advanced treatment that uses a combination of compressed, freezing cold CO_2 and hyaluronic acid. This cold shock triggers circulation, boosting collagen production and oxygenation, while the high-pressure application forces serum into the skin, ensuring deep absorption and effective hydration.

pH Formula Resurfacing Treatments

The Laser Beautique is also a registered partner of pH Formula, with many of our branches offering their advanced resurfacing treatments. pH Formula is a brand that prides themselves in controlled dermatological chemical skin resurfacing that is suitable for all skin types, formulated with their unique exclusive delivery complex—PH-DVC™.

External Services - Medical Grade

We also have a TLB affiliated doctor, Dr Garth Blunded, who offers Botox and Dermal Filler solutions for facial harmony concerns.

3.2. RETAIL PORTFOLIO

Scientific Skincare

Scientific Skincare is The Laser Beautique's own in-house skincare brand. Comprised of science-backed ingredients, this brand is specially formulated to give you real, transformative results, starting from the inside, out. We have 5 ranges, Skin Health, Ageing (Ultra), Compromised, Acne, and Pigmentation (Melano).

pH Formula

We are registered stockists of pH Formula, offering cosmeceutical-grade skincare solutions at home. pH Formula products use their advanced transport system and an active ingredient combination including AHAs, BHAs, PHAs, and Alpha Keto acids with a focus on the 4 main skin disorders—Hyperpigmented Skin, Chronic Redness Skin, Ageing Skin, and Acne-Prone Skin

Heliocare

Developed by Cantabria Labs, Heliocare is a Sun Protection solution that is gentle on the skin. The brand offers daily sunscreen options, tinted and foundation options with flawless coverage, and a paedeatric range. They also have a specialised care range that protects your skin from UV rays while putting a focus on intense repair, anti-ageing, and pigmentation correction.
